

Thank you for your interest in the RaceDots®Arranger™. These pricing guidelines are offered only to those interested in bulk purchases of RaceDots products. Prices and colors are subject to change. For specs, photos and diagrams see page 2.

**PRODUCT INFORMATION**

RaceDots are a simple, effective, non-destructive alternative to safety pins for holding a race number in place. RaceDots feature a patented design of two rare-earth magnets that lock together and stay in place without damaging fabric.

RaceDots Arranger is a silicone rubber sheet with pockets designed to hold the ring magnet portion of a RaceDot in position making race number attachment quick and easy. It is specifically designed for use under tight clothing typically worn by cyclists. The Arranger also helps keep RaceDots separated and easier to manage, prevents bunching and protects the magnets. The Arranger is designed to be worn against the skin or over a base layer, just under the top garment layer. The Arranger works best when the top garment layer is thin fabric, and tight fitting. We do not recommend using the Arranger for most runners or wearers of loose clothing as the added weight will create movement and may annoy the wearer.

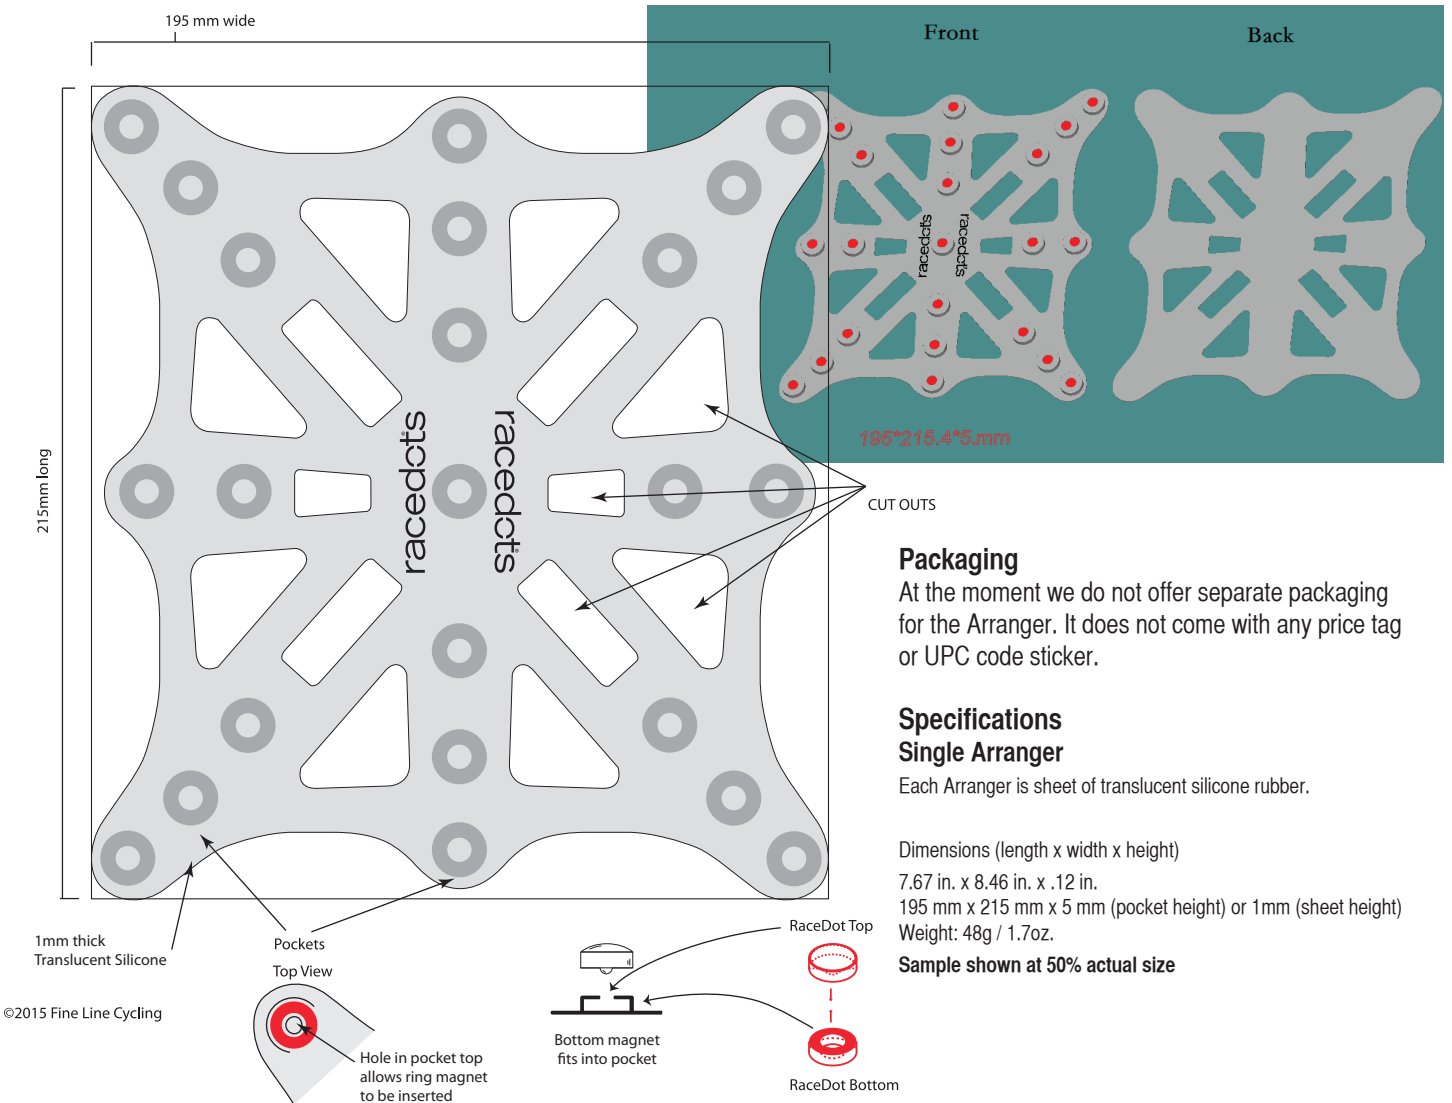

Please see our website for a “How To Use” videos. While RaceDots have not had any effect on timing systems or ANT/RFID devices in testing, RaceDots are not guaranteed to work with every product or timing system. For more information and FAQ, please visit our website at [www.racedots.com](http://www.racedots.com).

**RE-SALE PRICING**

RaceDots are available in packs of four and ten on a blister-wrapped hang card. We will add stock colors to the line as time goes on. We can include one POP display per 50 packs ordered, at no cost. Prices do not include shipping, handling or import fees. Minimum order quantity is 25 sheets. All prices are in US dollars.
