The Original Locking, Patented, Ridiculously Strong Alternative To Safety Pins

racedots[®]
MAGNETIC RACE NUMBER ATTACHMENT SYSTEM™

racedots.com

This Pack of 4 Was Assembled By Hand

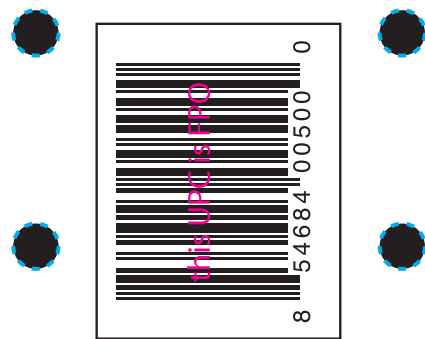

racedots[®]

RaceDots[®] are the simple, elegant and effective alternative to safety pins for attaching a race number. Each dot is a patented assembly of two rare-earth magnets that lock together to hold your race number in place, but they never hurt your clothing!

Runners: We recommend using 2 on top and 1 in the middle on the bottom of your number. Cyclists: Use at least 4 per number. Do NOT drop or let magnets snap together without something in between as they may break. Don clothing, then apply RaceDots.

WARNINGS: Keep out of reach of children - RaceDots pose a choking hazard. NEVER swallow RaceDots. If you have any medical device that may be affected by magnets, consult your physician before using. RaceDots have not had any effect on timing chips, heart rate monitors, RFID/ANT/GPS devices in testing. RaceDots contain nickel and rare-earth elements. Store RaceDots side by side, do not stack them. for more info and user tips, visit www.RaceDots.com
